
Sky-Astra™ R&D Program

“Different approach is the foundation of extraordinary creation”

Project overview

Building the Future of Drone Warfare & Anti-Drone Technologies

Under Project Sky-Astra™, Eleven String Pvt. Ltd. is initiating a **Next-Generation Research & Development Program** focused on designing, developing, and deploying advanced solutions for modern drone warfare.

This program is not limited to a single invention — it is a **multi-layered innovation framework** aimed at creating a complete ecosystem of **offensive, defensive, and counter-drone technologies**.

Core Focus Areas

1. Anti-Drone Systems

Development of scalable and rapid-response systems to detect, disable, and neutralize hostile drones in real-time scenarios.

2. Kinetic Counter Systems

Research and development of **kinetic-based counter mechanisms** that physically intercept, disrupt, or disable aerial threats with high efficiency and reliability.

3. Counter-Drone Weapons

Designing multiple categories of **anti-drone weapons**, including:

- Gun-based interception systems
- Projectile-based neutralization technologies
- Capture and entanglement mechanisms
- Close-range and long-range counter solutions

Innovation Approach

Our R&D approach is built on three principles:

- **Simplicity** → Solutions that are easy to deploy and operate
- **Scalability** → Technologies that can be mass-produced and widely used
- **Independence** → Systems that minimize reliance on complex electronics or external signals

Vision

To establish Sky-Astra™ as a **global innovation platform** for drone warfare technologies — enabling security forces, defense organizations, and governments to respond to emerging aerial threats with speed, precision, and confidence.

Strategic Direction

Through this R&D program, we aim to:

- Create multiple patented technologies
- Build a portfolio of next-generation defense systems
- Expand into global defense markets
- Position Eleven String Pvt. Ltd. as a leader in anti-drone innovation

Collaboration Opportunity

We invite:

- Defense organizations
- Strategic partners
- R&D collaborators
- Investors

to join us in building the future of aerial defense systems.
